EDUCATION

The University of Texas at Dallas
Bachelor of Science, Software Engineering

Richardson, TX
Expected May 2028

PROFESSIONAL EXPERIENCE

Auraion.ai — Lead UX/Full Stack Intern — *Paid Internship* June 2026 – August 2026

- Built a student-facing dual-interface frontend progressive web app and an internal ops dashboard for Auraion from detailed component specs, tuning UI density separately for each audience.
- Built a COPPA/FERPA-compliant onboarding pipeline with conversational intake and automated parent-consent routing, cutting account activation to under three minutes.
- Built adaptive UI logic that reads real-time student engagement signals to trigger contextual hints, switch input modes, and reset the workspace automatically.

TECHNICAL PROJECTS

RateMyCareer (Python, Flask, React.js, Supabase) — *Career Sentiment Analysis Website* December 2025

- Reduced sentiment misclassification by ~45% by upgrading the ML inference pipeline from VADER to RoBERTa with optimized tokenization and preprocessing.
- Eliminated manual moderation overhead by engineering an automated ETL pipeline that extracted, preprocessed, and stored 10,000+ social media posts with real-time updates.

LowBall (FastAPI, React Native, Gemini API) — *AI-Powered Marketplace Negotiation Companion* May 2026

- Architected a 100% async FastAPI backend with aiosqlite and a unified “Council-of-Thought” agent to minimize latency and simulate multi-persona negotiation reasoning.

Produck (Node.js, Express, SQLite, AWS) — *Full Stack Product Management Platform* November 2025

- Orchestrated a 14-agent AI council powered by the Gemini API to auto-generate market research reports, integrating directly with the Jira REST API to automate actionable task creation.

LEADERSHIP & EXPERIENCE

Project AI Implementation Lead (RateMyCareer) — *AI Mentorship (UTD Club)* Fall 2025

- Directed the technical architecture on a project for a team of 6 by selecting core machine learning models and frameworks, coordinating cross-functional database schema design and frontend visualization.
- Presented the end-to-end AI framework and development lifecycle to a panel of industry experts from leading technology companies (including Google and Apple), successfully defending model selection and integration strategies.

Team Captain — *FTC Team 8626 (Innovate & Design Award Winner)* Spring 2025

- Directed Agile development of a state-qualifying robot while simultaneously establishing a Java and mechanical design mentorship pipeline for 20+ students.

SKILLS

Languages: Java, Python, C++, PostgreSQL, HTML5, CSS, React.js, Next.js, Node.js, Flask, FastAPI, TypeScript

AI/Machine Learning: TensorFlow, scikit-learn, RoBERTa, OpenCV, NumPy, Pandas

Tools: Google Antigravity, Firebase, Supabase, Neo4j, MongoDB, AWS (EC2), Vite, Git, Figma, Linux (Ubuntu)

Methodologies: Agile, TDD, ETL, process improvement

Spoken Languages: English (Native), Japanese (JLPT N4 In-Progress)

Personal Skills: Powerlifting, Photography, Volunteering

HONORS & AWARDS

- DFW Stock Competition Winner, STREAM Foundation (106% ROI — \$2.06M 2-month simulated portfolio)
- 2nd Place Advanced League CodeQuest Winner, Lockheed Martin
- Figma Design Track Winner, HackAI Hackathon
- Chancellor’s Honor Roll, Dallas College
- National African American Recognition Award, College Board
